

Top tips & ways to save: Energy

Did you know ?

Energy suppliers can fix prices for clients up to a year in advance.

There are still some carbon reduction energy grants to be had for your company

1 Green and renewable energy deals are available at comparable rates to standard energy pricing.

2 If you are moving premises never listen to the cold call companies that tell you must supply your COT to them to ensure the best rate now or give them any details.

Companies like this pay for information on companies moving and then chase you before you have time to think. Select a reputable broker to handle this for you. It is something we offer.

3 If you are thinking of putting in an EV point, due diligence is primary to ensure quality above price. Cheaply made kit will cause long term outages and could render car sockets unusable.

4 The cheapest price at the start is not always the best price. Further tariffs can apply later on and are hidden in the detail. These could seriously affect your pricing in year 2 and 3 of a 3 year contract.
